

PCTEL Announces 4G/5G Dynamic Spectrum Sharing Testing

October 22, 2019

LOS ANGELES--(BUSINESS WIRE)--Oct. 22, 2019-- PCTEL, Inc. (Nasdaq: PCTI) announced at MWC Los Angeles new testing capabilities to support 4G/5G Dynamic Spectrum Sharing (DSS) and accelerate 5G New Radio (NR) rollouts. Dynamic spectrum sharing enables operators to use the same spectrum for both 4G LTE and 5G NR. PCTEL scanning receivers simultaneously test both 4G LTE and 5G NR coverage and signal quality so that operators can deploy dynamic spectrum sharing with confidence.

"Dynamic spectrum sharing is particularly important for operators in the United States, who will use it to provide broader 5G coverage on shared sub-6 GHz spectrum and to facilitate migration from non-standalone to standalone 5G networks," said Rishi Bharadwaj, PCTEL's Chief Operating Officer. "We developed our dynamic spectrum sharing feature to meet demand from wireless operators who trust PCTEL test and measurement solutions to help deploy 5G NR networks," added Bharadwaj.

4G/5G dynamic spectrum sharing testing is available on new and existing HBflex™ and IFlex® scanning receivers. HBflex scanning receivers also support mmWave 5G NR deployments with fast measurement rates suitable for full-speed drive testing.

PCTEL will demonstrate its test and measurement solutions for 5G NR, LTE, and other wireless technologies at MWC Los Angeles, booth S.2460.

About PCTEL

PCTEL is a leading global provider of wireless technology, including purpose-built [antenna systems](#), [Industrial IoT devices](#), and [test and measurement solutions](#). Trusted by our customers for over 25 years, we solve complex wireless challenges to help organizations stay connected, transform, and grow.
