PCTEL To Provide Segue Infrastructure for Wi-Fi 'Hotspot' Network Network To Service EyeforWireless Conference in San Francisco

CHICAGO, Feb 26, 2003 (BUSINESS WIRE) --

PCTEL, Inc. (NASDAQ:PCTI), a leading provider of Internet access products and wireless mobility software, announced that it will install a temporary public wireless local access network (WLAN) at the EyeforWireless conference, taking place in San Francisco at the Sheraton Gateway hotel, February 27-28, 2003. The Wi-Fi network will be configured using PCTEL's Segue (TM) Network Gateway, Segue Controller and a new dual-mode Segue(TM) Roaming Client, designed to facilitate connections between Wi-Fi networks, CDMA2000 1X and GPRS networks. The PCTEL network will provide enough capacity to serve an estimated 150 EyeforWireless conference participants.

"We are pleased to support the EyeforWireless conference with our Segue(TM) Gateway, Controller and Roaming Client software," said Marty Singer, PCTEL Chairman and CEO. "This conference is a natural fit for us, as we both have the same goals: to help service providers and users manage the convergence of Wi-Fi and cellular technologies to achieve ubiquitous coverage."

The EyeforWireless event will provide PCTEL an opportunity to showcase its Segue(TM) Network Gateway, Segue(TM) Network Controller and Segue(TM) Roaming Client products while giving conference attendees a fast, easy and enjoyable internet experience. Anyone attending the conference with a Wi-Fi-enabled PC or handheld device will be able to access PCTEL's free network.

PCTEL will also have free trial copies of its Segue(TM) Roaming Client available at its booth.

PCTEL offers three innovative mobility software products. Its Segue(TM) Roaming Client simplifies Wi-Fi network interface card installation and enables roaming between different 802.11 environments. It also permits roaming between WLANs and cellular networks such as CDMA2000 1x, GPRS and PHS. PCTEL's Segue(TM) Network Gateway and Segue(TM) Controller perform all of the routing, authentication, IP addressing, security, and billing access required in 802.11 networks.

PCTEL will also demonstrate its complete Segue(TM) product line at the upcoming CTIA Wireless '03 show in New Orleans, March 17 - 19, booth #6421 in the Morial Convention Center.

ABOUT PCTEL

PCTEL, founded in March 1994, is a leading provider of innovative and cost-effective Internet access solutions. PCTEL's products include analog soft modems, DSP-based modems and WLAN software products (Segue(TM) Product Line) that simplify installation, roaming, Internet access and billing. The company maintains a portfolio of more than 80 analog and broadband communications and wireless patents, issued or pending, including key and essential patents for modem technology. The company's products are sold to PC manufacturers, PC board and card manufacturers, wireless carriers, wireless ISPs, software distributors, and system integrators. PCTEL headquarters are located at 8725 West Higgins Road, Suite 400, Chicago, IL 60631. Telephone: 773-243-3000. For more information, please visit our web site at: <http://www.pctel.com>.

SAFE HARBOR STATEMENT This press release contains "forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995. Specifically, these statements include, statements regarding PCTEL's Segue(TM) Network Gateway, Segue(TM) Controller and Segue(TM) Roaming Client software product and the potential benefits of its public wireless local area network (WLAN) to facilitate connections between Wi-Fi networks, CDMA2000 1X and GPRS networks; our customers ability to inexpensively establish a footprint in "hot spots" through the use of our products; and the anticipated functionality of the products. These statements are based on PCTEL's current expectations and anticipated marketing efforts and actual results may differ materially from those projected as a result of certain risks and uncertainties. These risks and uncertainties include, but are not limited to the success of marketing, selling and supporting these products and services; whether such products and services achieve market acceptance; compatibility with the technology of other wireless products and services; and PCTEL's ability to accurately forecast customer requirements. These risks and uncertainties and others that relate to PCTEL's business, financial condition and future operating results, including, but not limited to, those detailed from

time to time in PCTEL's Securities and Exchange Commission filings, can affect actual results. These forward-looking statements are made only as of the date hereof, and PCTEL disclaims any obligation to update or revise the information contained in any forward-looking statement, whether as a result of new information, future events or otherwise.
